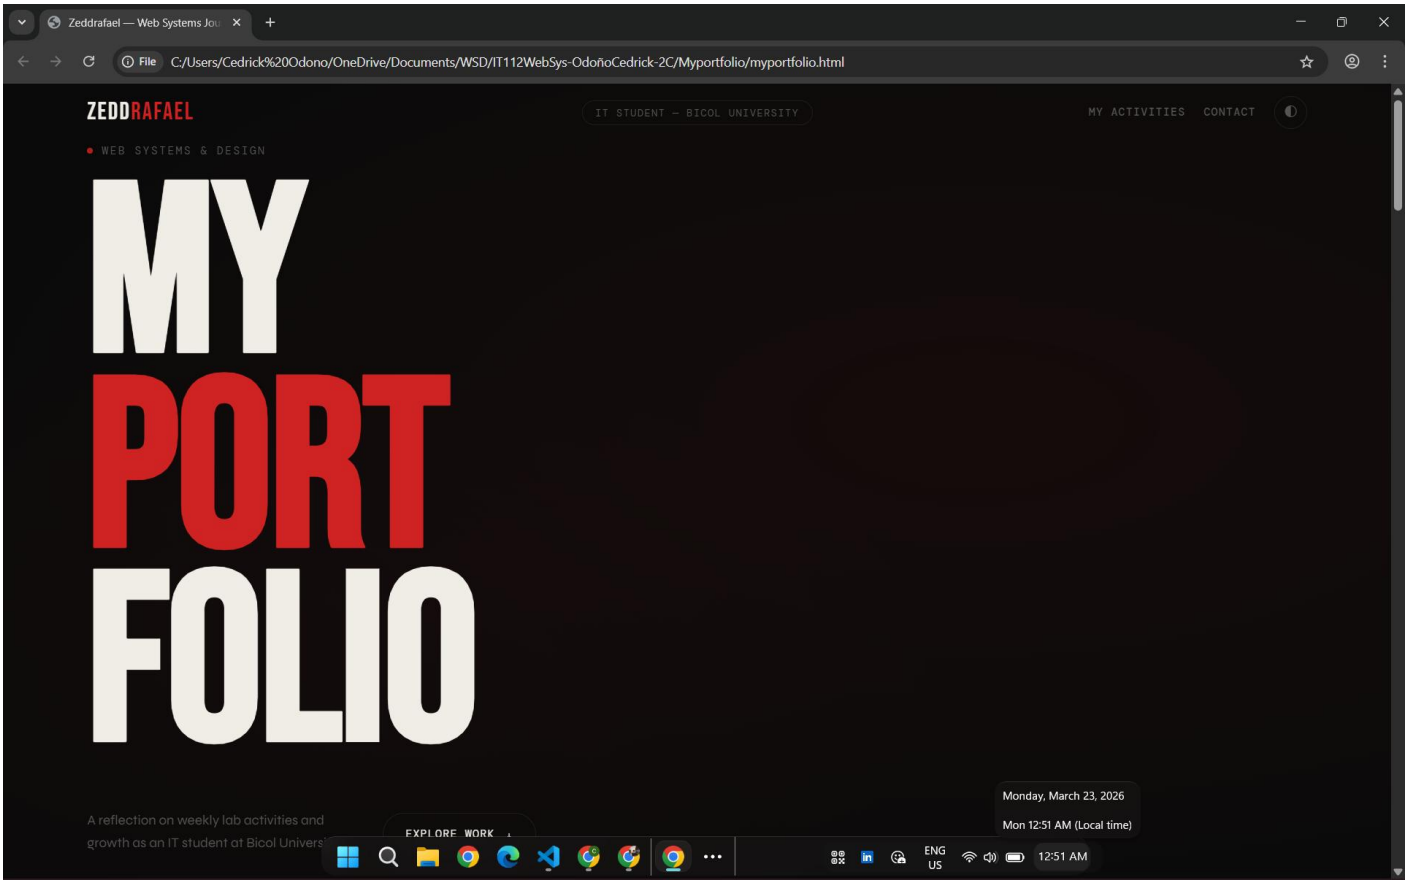
IT 112: Web Systems and Technologies
Laboratory Reflection – My Portfolio

Name: Odoño, Cedrick R.. **Course/Year:** BSIT-2C
Instructor: Guillermo V. Red, Jr. **Date:** 03-23-26



I created a webpage where all my activities are organized in one place, making it look cleaner and more professional compared to having separate pages. Honestly, when I first started working on the midterm requirement, I thought the task was simply to build a webpage and put all my activities there. Later, when I asked my classmate, I realized that wasn't exactly the case. But instead of letting my effort go to waste, I decided to continue with it; similar to what I did back in Week 6. In the end, I actually enjoyed building it.

To keep everything consistent, I used the same theme across all pages; headers, navigation, and footers, and added my contact information to make it look more complete. For each activity, I also included a short description of what the weekly task was about, so the portfolio reflects both the work and the learning behind it.
