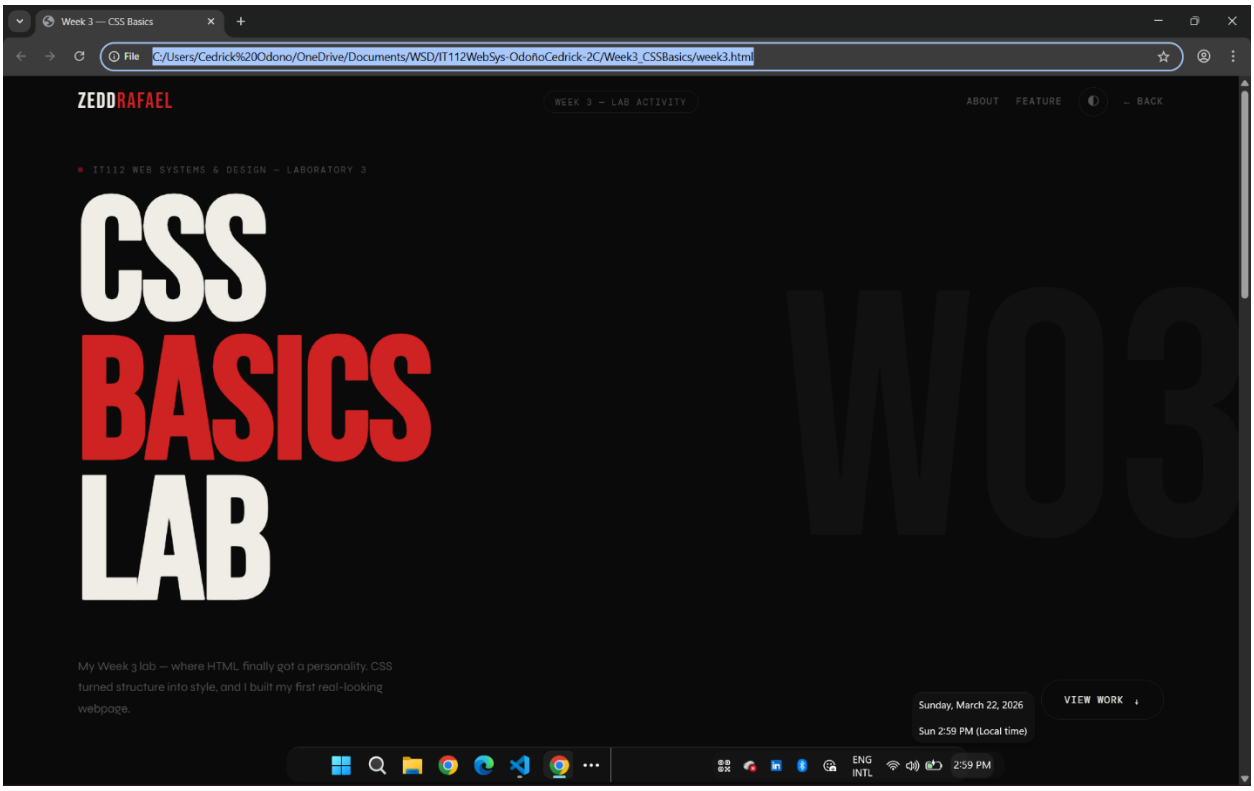
IT 112: Web Systems and Technologies
Laboratory Reflection – Week3_CSSBasic

Name: Odoño, Cedrick R.. **Course/Year:** BSIT-2C
Instructor: Guillermo V. Red, Jr. **Date:** 03-22-26



At this stage, I started learning how to transform plain HTML into a more engaging and dynamic webpage by incorporating basic CSS. My initial laboratory activity was simple because of limited knowledge, but I gradually applied the lessons I had accumulated from Weeks 1 through 7. I faced challenges with flexbox and text alignment, especially when trying to center elements, so I kept the layout straightforward.

The main features followed the laboratory guide, and although I wanted to add more, time constraints meant I focused on consistency across my pages; using the same header, navigation, and footer.

Despite the simplicity, I found the CSS basics very helpful. Online resources played a big role in guiding me through syntax and techniques, and without them, my webpage wouldn't have turned out as organized as it did.
