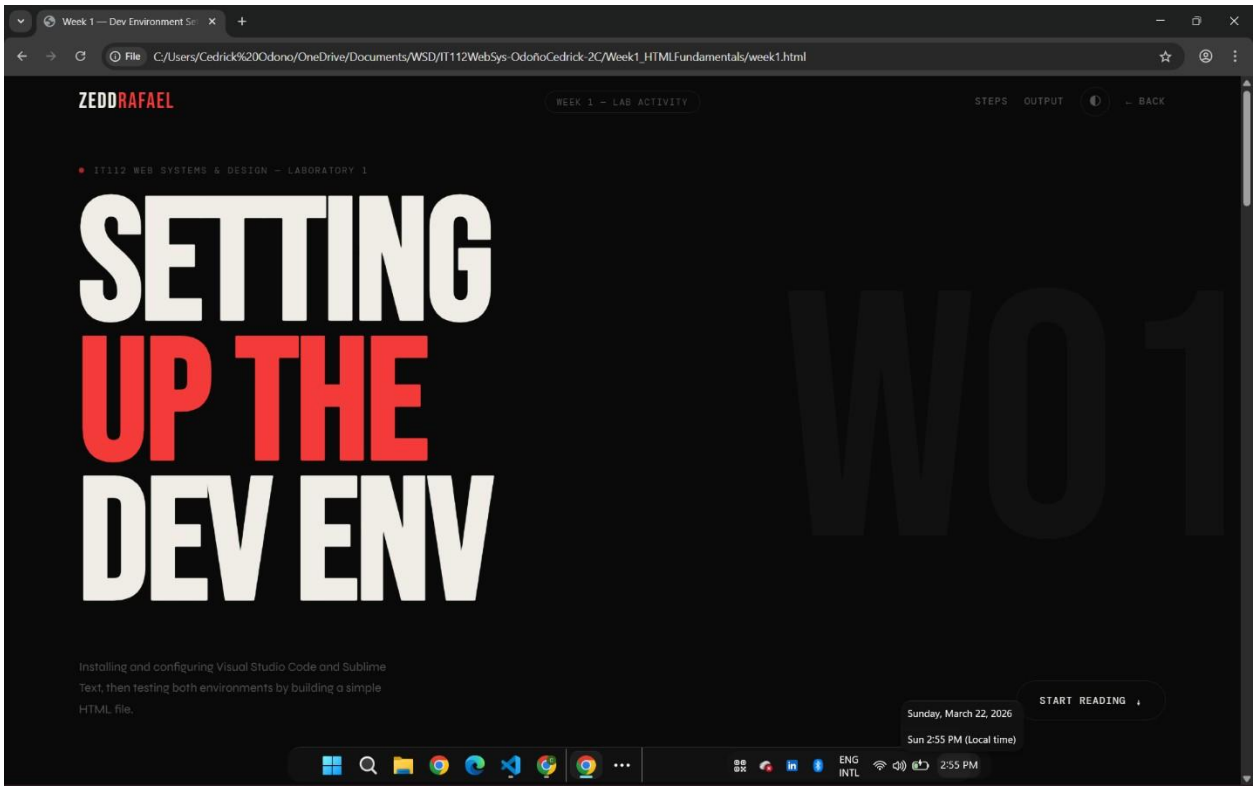
IT 112: Web Systems and Technologies
Laboratory Reflection – Week 1

Name: Odoño, Cedrick R.. **Course/Year:** BSIT-2C
Instructor: Guillermo V. Red, Jr. **Date:** 03-22-26

Reflection: Week1_HTMLFundamentals



This was my first time encountering the syntax of HTML and using Sublime Text. At that point, the activity didn't feel very engaging yet, since we were only asked to download the tools and print a simple "Hello World" in VS Code and Sublime.

Because the instructions were straightforward, there wasn't a formal laboratory activity for this week. Instead, I include the steps I followed to download the editors and what I did during that time on my week 1 webpage.

To make my webpage more engaging, I applied some of the learnings I gained later on by adding basic CSS and JavaScript code. This allowed me to transform a simple exercise into something more interactive and visually appealing.
