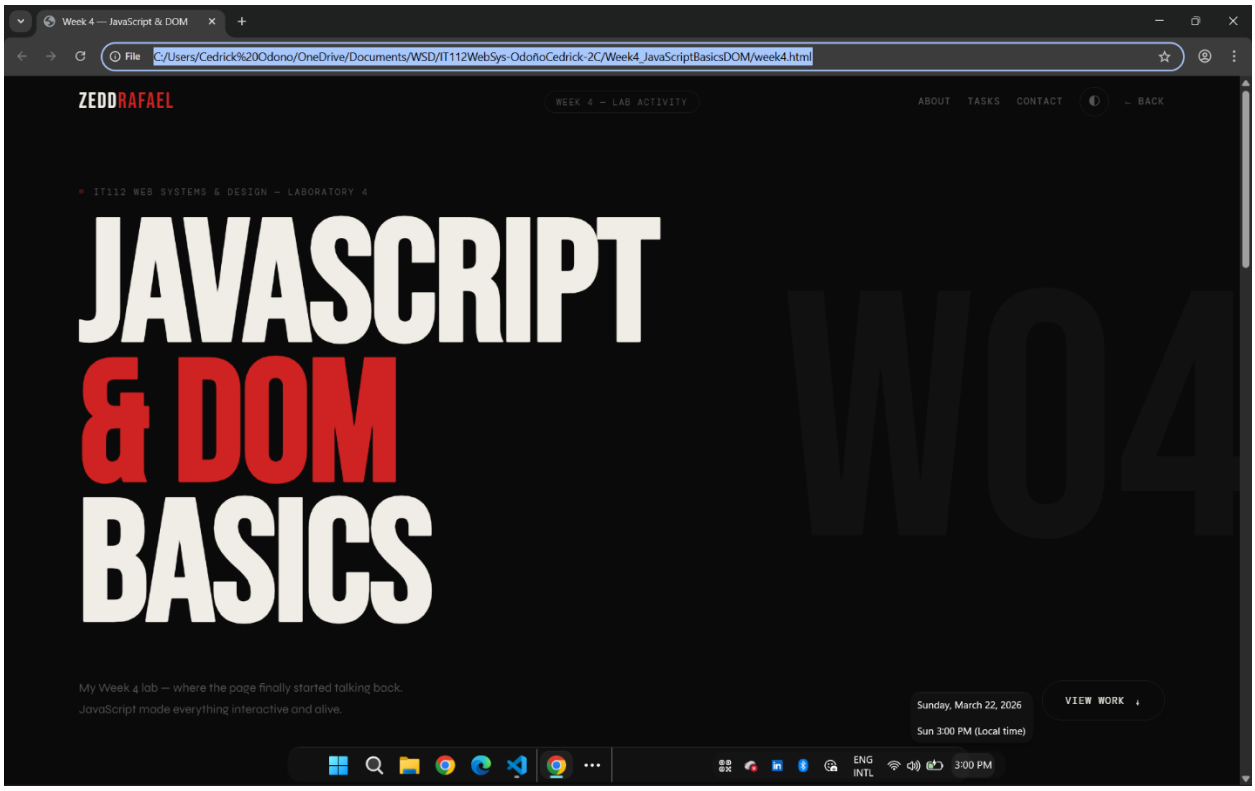
Laboratory Reflection – Week4_JavaScriptBasicsDOM

Name: Odoño, Cedrick R.. **Course/Year:** BSIT-2C
Instructor: Guillermo V. Red, Jr. **Date:** 03-22-26



At this stage, I learned how to use JavaScript together with the DOM to make content interactive instead of static. My main project was building a Task Manager, where users could add tasks, mark them as complete, or delete them. I also added the Contact Form with validation which is on my original laboratory activity, showing how JavaScript can directly control page elements and improve usability.

Even though this was my first step into DOM manipulation, it gave me a strong foundation in interactivity. By applying the lessons from previous weeks, I was able to upgrade my earlier outputs; moving from simple layouts to functional features that respond to user actions.
